LCDR Marks: Training Program Manager 452- 4646

CAPT Reynolds: CMEO Officer and Program Manager : 452-8052

CAT Info Guide. The Command Assessment Team Information Guide should be issued to the students in the CMEO Officer's course for use during lesson 3-4, Training and Assessments. Instructors should encourage CMEO Managers to use the guide as a resource when conducting its assessment. Even though assessment teams are no longer required, encourage CMEO Managers to use the team (concept), regardless to whether 2 or 20 personnel participate in the process. Also inform the students that commands have the option of completing all or part of steps 1-3 for the assessment. However steps 4-6 [analysis, the plan of action, and commander's report] still need to be completed.

Promulgation of the FY01 MTT schedule. Since CTTI training is optional, CNET will not promulgate a message request for training requirements. Sites, however, are encouraged to query their sites for input. We will accept input from all sites through April, and the schedule will be promulgated via message and the web NLT 1 July. The schedule will be based on input from the sites and the historical training data. POC: MACM Brown.

Survey of Training Usage. We are conducting an informal survey of instructor and course usage since promulgation of NAVOP 003/99. Forward the following information NLT 15 March.

- # of classes taught
- # of classes cancelled
- Average # of students (include a maximum and minimum also)
- Other duties to which EOA instructors are being assigned.

The info is requested for the time period of 1 July 99 to 28 Feb 00. POC: YNC Branch.

Status of CMEO Course Revision.

The first meeting was held in Dec 99 to determine required changes. NLTU Coronado, CCMM, is currently preparing a course framework for the new course. Another curriculum review meeting will be held later this year. CNET will fund previous working group members for the review, and will consider others if previous members are not available. Meeting dates and attendees will be promulgated at a later date.

Status of CATIC CD-ROM update.

The second revision is underway. This revision incorporates the changes as a result of NAVOP 003/99 regarding optional assessment processes and survey options. Expect distribution via the web by the end of the fiscal year.

Status of the CTTIC Revision. A revision to CTTIC/NR&R curricula or the development of a new workshop is on hold pending guidance and/or a decision regarding restructuring of EOA billets. A decision on the restructuring, either realignment or regionalization, will determine the best course of action to pursue for a future EO workshop. Additional info will be promulgated in the near future.

This newsgram provides current information regarding the status of Navy CMEO training proposals and initiatives. It does not direct formal policy, unless specifically stated as such. Your input is welcome. Distribution dates are 1 Mar, 1 Jun, 1 Sept, and 1 Dec each year.
